

Ahead in control

The *Veterinary Laboratories Agency* is one of the 19 partner institutes of EPIZONE

- The largest international scientific network focused on animal diseases such as bluetongue, foot-and-mouth disease, African/classical swine fever, avian influenza, West Nile fever and peste des petits ruminants.
- 300 scientists from Europe, China and Turkey, working together to harmonise and improve the prevention and control of animal diseases.
- Themes: diagnostics, vaccine development, epidemiology and surveillance and risk assessment.
